09.30 Registration and coffee

09.50 Welcome

Rachel Palmer, COO, EMEA, Macquarie Group

09.55 Introduction & Chair

Stewart Dresner, Founder and Chief Executive, PL&B

10.00 Statement on the government's broad AI objectives

Alexandra Leonidou, Head of AI Regulation, Office for AI, DSIT

10.10 Part 1 – Deploying AI in practice

- Implementation of AI projects with a focus on data-related risks
- Training and testing AI models - what data should we use?
- Understanding data risks
- The role of the DPO and legal advisors in practice

Rebecca Cousin, Partner, Slaughter and May
Olga Ganopolsky, General Counsel – Privacy and Data, Macquarie Group

- Types of AI and their risk profiles

Ben Rapp, Founder and Principal, Securys

- Algorithm development

All participants invited to share their experience

- Use of AI for analysis of documents e.g. complaints, contracts
- Predictive analytics and scoring for risks e.g. for loans, insurance, health

Rebecca Cousin, Partner, Slaughter and May
Olga Ganopolsky, General Counsel – Privacy and Data, Macquarie Group

- How should DPOs monitor this AI enhanced capability?

Olga Ganopolsky, General Counsel – Privacy and Data, Macquarie Group

Ben Rapp, Founder and Principal, Securys

All participants invited to share their experience

11.10 Break

11.30 Part 2 - Government and Regulator responses

- The UK Government's and ICO's AI policies
- Risks of discrimination
- To what extent can AI see patterns in data and metadata sometimes be related to identifiable specific individuals and groups?
- Optimum ways to working with regulators
- Working with government and industry groups

Stephen Almond, Executive Director, Regulatory Risk, ICO
Alexandra Leonidou, Head of AI Regulation, Office for AI, DSIT

All participants invited to share their experience

12.30 Lunch

13.30 Part 3 – Working effectively within an organisation deploying AI

- How does AI fit into your organisation's strategy, governance and accountability framework aligned with your organisation's values and mission?

Ben Rapp, Founder and Principal, Securys

- Working with AI creators. DPOs as advisers. What is the DPO/compliance team's role. Monitoring product and service developments and timely intervention

Olga Ganopolsky, General Counsel – Privacy and Data, Macquarie Group, Australia

- Testing systems and testing governance

Rebecca Cousin, Partner, Slaughter and May

- DPOs as consumers of AI tools. Can AI tools assist in data compliance? For example, in drafting DPIAs, or using AI to respond to routine communications, such as enquiries, complaints and DSARs

All participants invited to share their experience

- Organisational design - depending on the role of AI and the specific industry, the DPO may need to sit in functional/reporting line different from their current position

Ben Rapp, Founder and Principal, Securys

- Liability: how will individual staff members be able to veto automated decisions and how can affected individuals to seek redress?

Rebecca Cousin, Partner, Slaughter and May

15.00 Next steps

- Any advice to Government and Data Protection Authorities
- Policy Priorities
- Organisations' priorities

Roundtable discussion with all participants

15.30 Close
